EDUCATION

DePauw University - B.A. in Computer Science, Minor in Business Analytics, *Magna Cum Laude* **08/2022 - 05/2026**

University of Oxford, Jesus College - Visiting Student in Artificial Intelligence **09/2025 - 12/2025**

Honors and Involvements: DePauw Merit Scholarship, Science Research Fellow, Outstanding Leadership Award, Computer Science Honor Society, Excellence in Social Wellness Programming, Dean's List (every semester)

Relevant courses: Web Programming, Artificial Intelligence, Machine Learning, Business Analytics, Statistics

WORK EXPERIENCE

Web Management Intern, DePauw Communications & Marketing Office **05/2025 - 05/2026**

- Defined technical and product requirements for 1,500+ university web pages as part of an AI-driven search and generative engine optimization initiative.
- Collaborated with Marketing, IT, and academic leadership to prioritize features, align stakeholders, and manage implementation timelines across 10+ teams.
- Applied analytics and content optimization strategies to improve web discoverability, accessibility, and AI search indexing.

ML/AI Research Intern, Computing Research Association **05/2024 - 08/2024**

- Researched AI-based sign language recognition for a VR learning platform, analyzing dataset quality and model performance to support accessibility use cases.
- Investigated selection bias in training datasets and proposed balancing strategies to improve model generalization and recognition reliability.
- Presented comparative analysis of 10+ AI and computer vision accessibility tools and delivered recommendations at the XR Access Conference.

Development & Alumni Data Management Intern, DePauw University **01/2023 - 05/2025**

- Maintained and validated 15,000+ alumni and donor records in Abila Millennium to support engagement campaigns and analytics.
- Redesigned internal data workflows and automation processes, reducing record update time by 20% and improving team productivity.
- Executed database queries and quality checks to support data-driven decision making across 3+ departments.

PROJECTS

FlowCast Period Productivity Platform **02/2026 - 05/2026**

- Built and deployed an end-to-end ML productivity prediction platform using menstrual health data, integrating a FastAPI backend with Streamlit and Netlify for real-time user predictions.

NetWorks Mentorship Platform **02/2026 - 03/2026**

- Led product development for a mentorship platform by conducting 100+ user interviews, defining product roadmap and agile sprints, and launching a beta with smart matching and onboarding that improved activation by 60%; earned 2nd place and \$1,500 at the McDermond Startup Pitch Competition.

Neural Network Image Classification (Fashion-MNIST) **11/2025 - 12/2025**

- Developed 1- and 2-layer MLPs from scratch in Python to classify 10,000+ images, achieving 85% accuracy using ReLU, softmax, and backpropagation as part of an AI project at the University of Oxford.

SKILLS

Languages: Python, JavaScript, SQL

Frameworks & Tools: FastAPI, Streamlit, Vue.js, Pandas, NumPy, Scikit-learn, Git, Jupyter Notebook, Excel

Concepts: Machine Learning, Neural Networks, Feature Engineering, PCA, Model Evaluation, Data Analysis

Databases & Platforms: Abila Millennium, BigTree CMS, Internal Data Management Systems
